OMS
The Organization Management System (OMS) is an online event marketing, registration, management, and reporting system designed to meet the unique needs of educational agencies throughout California. It was created in 2003 to assist in reporting workshop data for our county office of education. It has grown to over 54 clients with over 2000 individual departments utilizing all features of the OMS on a daily basis.

Our clients include the California Department of Education, the California County Superintendents Educational Services Association Arts Initiative, 25 county offices of education, 22 school districts, one community college and six “other” education groups.

Provides
• Accountability for professional development provided by California educational agencies
• Ability for teachers, administrators, classified staff, and parents to track their professional development hours through personal OMS accounts and calendar
• Web-based customizable professional development calendars for easy viewing and registration, including the option to embed in your website
• Easy to use reporting features on professional development, registrations, site level and participant attendance, grant monitoring and unique events
• Tools for tracking additional services, classroom walk-throughs, and site visits by staff, coaches, mentors or consultants

Cost
The OMS is a fee-based subscription service available to all educational agencies in California. Onsite or online training is included in the subscription during the first year of implementation.

Contact us for more information and a demonstration of features.
